MATHEMATICAL NOTES
Volumes 7-8, 1970
(A translation of Matematicheskie Zametki)

VOLUME 7, NUMBER 1, JANUARY, 1970

	Engl.	Russ.
Viktor Sil'vestrovich Charin (On His 50th Birthday)	3	5
Unbounded Divergence of Fourier Series of Continuous Functions—V. V. Buzdalin	5	7
De La Vallé Poussin Means of Fourier-Gegenbauer Series—S. O. Kallaev	13	19
Order of the Best Spline Approximations of Some Classes of Functions—Yu. N. Subbotin and N. I. Chernykh	20	31
Diameter of Class $W^r L$ in $L(0,2\pi)$ and Spline Function Approximation—Yu. N. Subbotin	27	43
On the Representation of Functions by Dirichlet Double Series—V. P. Gromov	33	53
Extremal Problems for Bounded Analytic Functions with Supplementary Conditions—A. N. Kochetkov	38	63
Existence of Discontinuous Solutions for Simplest Semidefinite Problems of Variational Calculus—V. N. Koshelev and S. F. Morozov	42	69
On the Shafarevich-Tate Group of an Elliptic Curve—M. I. Bashmakov	48	79
On the Representation of Numbers by a Binary Cubical Irreducible Form—V. A. Dem'yanenko	53	87
Consecutive Residues and Nonresidues of Polynomials—L. E. Mazur	59	97
A Property of Compactness of Families of Functions Harmonic with Respect to a Markov Process—M. G. Shur	66	109
On the Projective Dimension of Torsion-Free Abelian Groups over the Ring of its Endomorphisms—M. N. Arshinov	70	117
On the Krull-Schmidt Theorem for the Representation of Groups over P-Integer Number Rings—P. M. Gudivod and E. Ya. Pogorilyak	74	125

VOLUME 7, NUMBER 2, FEBRUARY, 1970

Note on the Addition Theorem for Legendre Functions—N. N. Beloozerov	83	137
Estimates of Derivatives in a Mixed L_p-Norm on a Domain and an Extension of Functions—O. V. Besov	89	147
Characteristic of Chebyshev Subspaces of Finite Codimension in L_1—A. L. Garkavi	95	155
Analytic Functions Which are Regular in a Disc and Smooth on its Boundary—B. I. Korenblyum and V. C. Korolevich	100	165
Some Complete Sets of Complementary Elements of the Symmetric and the Alternating Group of the n-th Degree—G. Ya. Binder	105	173
On the Representability of a Direct Interlacing of Groups by Matrices—Yu. E. Vapné	110	181
Degenerate Fibers of Three-Dimensional Manifolds Fibered into Rational Surfaces—B. V. Martynov	115	191
On Approximating the Roots of Some Transcendental Equations—A. A. Shmelev	122	203
Problem of Ito and McKean on the Massiveness of the Set of Primes—I. A. Kogan	127	211
Estimating Probabilities for Sumes of Independent Random Vectors—M. Mamatov and Sh. K. Formanov	130	217
Transformations Which Leave a Measure Quasi-Invariant—V. Ya. Golodets	134	223
On Some Existence Theorems for the Solutions of a Class of Nonlinear Operator Equations—G. M. Goncharov	137	229

	Engl.	Russ.
Addition to the Classical Theory of Favard—V. V. Zhikov	142	239
Theorem of Bartle, Dunford, and Schwartz Concerning Vector Measures —V. I. Rybakov	147	247
Eigenfunctions of the Beltrami-Laplace Operator on a Hyperboloid of One Sheet —V.-B. K. Rogov	152	255

VOLUME 7, NUMBER 3, MARCH, 1970

Relationship of Several Variational Methods for the Approximate Solution of Ill-Posed Problems — V. V. Vasin	161	265
Necessary Time-Optimality Conditions in the Case of Two Control Parameters with Different Functional Natures — G. K. Zakharov and V. I. Plotnikov	166	273
Bounds Connected with the Stability Theorems of H. Cramer — S. G. Maloshevskii	171	281
Distribution of Poles of Rational Functions of Best Approximation — G. A. Volkov	176	289
Radius of Univalence of Holomorphic Functions — V. I. Gavrilov	179	295
Completeness in Analytic Spaces of Subsequences of Laguerre and Jacobi Polynomials — N. I. Nagnibida	182	299
Normed Spaces in which the Unit Sphere has no Bias — N. I. Gurarii and Yu. I. Sozonov	187	307
Method of the Moving Coordinate Frame in the Problem of Classifying Manifolds in Algebraic Klein Space — Yu. E. Borovskii	190	311
Realization of all Distances in a Decomposition of the Space R^n into n + 1 Parts — D. E. Raiskii	194	319
Combinatorial Lemma and Structure of a Class of Binary Codes — Al. A. Markov	197	325
Endomorphically Closed Quasigroups — A. D. Bol'bot and Yu. N. Golubev	201	333
Ordered Sets and Their inf-Endomorphisms — Yu. M. Vazhenin	204	339
A Ring of Quotients — L. Sh. Ioffe	209	349
Rings over Which Every Module has a Maximal Submodule — L. A. Koifman	215	359
Pseudo-Injective Modules and Self-Pseudo-Injective Rings — G. M. Tsukerman	220	369

VOLUME 7, NUMBER 4, APRIL, 1970

From the Editors	229	381
Application of Number of Theory in Mathematical Statistics—Yu. V. Linnik	230	383
Necessary Condition for the Regularity of Branching Processes—B. A. Sevast'yanov	234	389
Fourier Coefficients of Functions of Class Lip α with Respect to Complete Orthonormalized Systems—S. V. Bochkarev	239	397
On the Set of Sums of a Functional Series—E. M. Nikishin	243	403
Some Extremal Properties of Positive Trigonometric Polynomials—S. B. Stechkin	248	411
Linear Method for the Approximation of Differentiable Functions—Yu. N. Subbotin	256	423
On Series with Respect to a Schauder System—P. L. Ul'yanov	261	431
On the Maximal Dual Pairs of Invariant Subspaces of J-Self-Adjoint Operators—H. Langer	269	443
Almost-Geodesic Mappings of Affinely-Connected Spaces and e-Structures—N. S. Sinyukov	272	449
Direct Limits of Semi-Simple Rings—Khr. Jensen and L. A. Skornyakov	279	461
Problem in the Theory of Cubic Residues—I. V. Reshetukha	284	469
Generalization of the Additive Problem of Divisors—L. I. Ufimtseva	289	477
Regularization of Ritz Method on an Example of Polynomial Approximation—N. S. Bakhvalov and M. Shtrekho	293	483
Spectrum of an Elliptic Equation—A. G. Aslanyan and V. B. Lidskii	300	495
Theory of Characteristic Lyapunov Indices—V. M. Millionshchikov	305	503
Reports Presented at the General Meeting of the Mathematics Division of the Academy of Sciences of the USSR. Properties of Spectra of Nonnegative Self-Adjoint Extensions of Elliptic Operators and Exact Conditions for the Convergence and Riesz Summability of Fourier Series of Various Classes of Functions—V. A. Il'in	312	515

VOLUME 7, NUMBER 5, MAY, 1970

Fields with Two Linear Orderings—S. V. Bredikhin, Yu. L. Ershov, and V. E. Kal'nei.	319	525
SL-Isomorphism of a Structurally Ordered Group—K. M. Kutyev	326	537
An Infinite Irreducible Set of Semigroup Identities—E. S. Lyapin	330	545
Free Expansions of the Intersection of Manifolds of Universal Algebras—V. N. Matus	333	551
On Points of Finite Order on Elliptic Curves—V. A. Dem'yanenko	340	563
An Estimate of an Incomplete Linear Form in Several Algebraic Numbers—N. I. Fel'dman	343	569
Radii of Convexity and Close-to-Convexity of Certain Integral Representations—F. G. Avkhadiev	350	581
Approximate Properties of Sets in Banach Spaces—L. P. Vlasov	358	593
Teikhmyuller Problem for One Class of Open Riemannian Surfaces—V. V. Dumkin and V. G. Sheretov	365	605
On the Approximate Calculation of the Coefficient of Correlation between Two Functions of Dependent Random Variates—I. O. Sarmanov	372	617
On a Characteristic Property of the Lorentz Space in the Class of Symmetric Spaces—D. V. Salekhov	378	627
Functional Equations in the Theory of Semigroups—V. P. Anosov and P. E. Sobolevskii.	382	635
DOCTORAL DISSERTATIONS		
Spaces of Kinematic Type—R. I. Pimenov	386	641
Certain Problems of the Theory of Difference Boundary Value Problems—V. S. Ryaben'kii	393	655

VOLUME 7, NUMBER 6, JUNE, 1970

The Number of Solutions of a Waring-Type Congruence—B. G. Kotsarev	401	665
The Chromatic Class and the Location of a Graph on a Closed Surface—L. S. Mel'nikov	405	671
Isomorphic Extension Theorem—A. I. Pilatovskaya	412	683
Retracts of Structures—T. S. Fofanova	415	687
Nonexistence of O-Injective Partially Ordered Modules—M. A. Shatalova	419	693
Dimension-Increasing Mappings—G. S. Skordev	421	697
Invariant Finite-Dimensional Exponential Families on Homogeneous Spaces—P. N. Sapozhnikov	427	707
Removability of Certain Sets in the Class of Three-Dimensional Quasiconformal Mappings—A. P. Kopylov and I. N. Pesin	432	717
Order of Approximation of Functions of the Class $Z_2(E^n)$ by Linear Positive Convolution Operators—A. I. Kamzolov	435	723
Criterion for the Compactness of a Class of Functions of $W^l_m(1 < m/ \leq n)$—S. F. Morozov and V. I. Sumin	441	733
Stability of Nonlinear Systems with Delay—V. B. Kolmanovskii	446	743
Negative Spectrum of the Schrödinger Operational Equation—D. R. Yafaev	451	753
DOCTORAL DISSERTATION		
Direct and Inverse Approximation Theorems in Banach Spaces and Fourier Transforms—N. P. Kuptsov	458	765

VOLUME 8, NUMBER 1, JULY, 1970

A Note Concerning the Kramér-Rao and Bhattacharyya Inequalities in Statistical Estimation Theory—Yu. V. Linnik	469	3
A Condition for the Extinction of a Bounded Branching Process—A. M. Zubkov	472	9

	Engl.	Russ.
A Lower Bound for Linear Forms in Values of Certain Hypergeometric Functions —A. I. Galochkin	478	19
The Chebyshev Point of a System of Translations of Subspaces of a Banach Space —P. K. Belobrov	485	29
Best Approximations of Continuous Functions by Spline Functions—V. L. Velikin	492	41
The Convergence of Trigonometric Series to Functions of Bounded Variation —K. I. Oskolkov	496	47
A Property of Fourier Series—A. M. Rubinov	504	59
Construction of Banach Spaces Using a Generalization of the Scalar Product —N. N. Chaus	508	67
Exact Functions on Manifolds—O. I. Bogoyavlenskii	514	77
Characterization of the Simple Groups PSL (2, 2^n) and Sz(q) by Biprimary Subgroups —V. A. Belonogov	518	85
Some Remarks Concerning the Infinite Distributivity of Lattices—M. G. Rabinovich	523	95
Simple Bases and the Number of Functions in Certain Classes Introduced by Post —I. M. Sheinbergas	528	105
The Loss of the Property of Reducibility by Systems of Linear Differential Equations with Almost Periodic Coefficients—I. N. Blinov	534	115
P-Separation of Variables in Laplace's Equation—I. I. Tugov	538	121

VOLUME 8, NUMBER 2, AUGUST, 1970

Convergence of Orthogonal Series to $K + \infty$—R. I. Ovsepyan and A. A. Talalyan	545	129
Classes Characterized by Best-Possible Approximation by Spline Functions—V. A. Popov and Bl. Kh. Sendov	550	137
A Class of Functions of a Real Variable—Yu. I. Alimov	558	149
Some Inequalities of the Type Encountered in Imbedding Theorems—Kh. Sh. Mukhtarov	564	159
A Class of Nuclear Spaces—M. M. Dragilev and V. P. Kondakov	569	169
The Existence of a Solution of a Linear Integral Equation—Ya. S. Bugrov	575	181
Completely Linear Functionals in Partially Ordered Spaces—G. Ya. Lozanovskii	578	187
Regular and Singular Hermitian Operators—Yu. L. Shmul'yan	583	197
A Transformation of the Circle—L. A. Bunimovich	587	205
Scattering at a Strongly Singular Potential—V. V. Kucherenko	593	217
A Theorem Concerning the Existence of Periodic Solutions of Systems of Differential Equations with Delayed Arguments—V. V. Strygin	600	229
Representations of Third-Order Matrix Rings—V. V. Kirichenko	603	235
Flat Cyclic Modules—R. B. Treger	608	245
Uniqueness of the Solution of Christoffel's Problem for Nonclosed Surfaces —Yu. A. Volkov and V. I. Oliker	611	251
The Siegel-Brauer Theorem Concerning Parameters of Algebraic Number Fields —A. F. Lavrik	615	259
Communications Presented at the General Meeting of the Mathematics Division, Academy of Sciences of the USSR. A Note Concerning Passive Linear Systems —V. S. Vladimirov	618	265

VOLUME 8, NUMBER 3, SEPTEMBER, 1970

Asymptotic Properties of a Solution of a Boundary-Value Problem—A. M. Il'in	625	273
Properties of Solutions of Certain Two-Dimensional Nonlinear Systems of Ordinary Differential Equations on and outside a Stable Manifold—N. B. Konyukhova	632	285
An Inverse Problem for Periodic Jacobi Matrices—I. V. Stankevich	639	297
Errors in Approximate Solutions of Cauchy's Problem for a First-Order Quasilinear Equation—V. G. Sushko	646	309

	Engl.	Russ.
Homogeneous Regions on the Conformal Sphere—B. N. Kimel'fel'd	653	321
Influence of Geometric Properties of Space on the Convergence of Cauchy's Method in the Best-Approximation Problem—V. I. Berdyshev	657	329
Integral Representation of a Class of Analytic Functions—B. E. Gopengauz	663	339
Influence of Deformation of the Boundary on Certain Conformal Properties or Regions (Regions in V. I. Smirnov's Class S)—G. Ts. Tumarkin	669	351
Effective Bounds for the Number of Solutions of Certain Diophantine Equations —N. I. Fel'dman	674	361
Torsion-Free Groups with Factor-Groups on Their Hypercenter which are Periodic —V. M. Kotlov	680	373
Threshold Theorems for a Stochastic Model of an Epidemic with Natural Immunization —A. V. Nagaev and G. I. Rakhmanina	686	385
DOCTORAL DISSERTATION		
Random Flows Generated by Random Processes (Properties of Random Flows, Level-Crossing Problems)—Yu. K. Belyaev	691	391

VOLUME 8, NUMBER 4, OCTOBER, 1970

Some Comments on Branching Processes—O. V. Viskov	701	409
Zeros of the Riemann Zeta-Function—S. B. Stechkin	706	419
Approximation of Functions by Partial Sums of Fourier Series in Polynomials Orthogonal on an Interval—V. M. Badkov	712	431
Constructive Properties of Functions with Variable Smoothness—V. Ya. Yanchak	718	443
Linear Extensions of Dynamic Systems and the Reducibility Problem—S. B. Katok	722	451
Linear Integro-Differential Equations with Almost-Periodic Coefficients—A. I. Yartsev	729	463
Convergent Sequences of Linear Operators in Semiordered Spaces—R. K. Vasil'ev	736	475
Analog of the Secant Method for Banach Spaces—V. A. Ogneva and V. M. Chern'yshenko	742	487
Stability of Systems of Generators of the Algebra C on Manifolds—A. A. Preobrazhenskii	746	493
Free n-Groups—V. A. Artamonov	750	499
Topological Abelian Groups with a Dedekind Lattice of Closed Subgroups—Yu. N. Mukhin	755	509
Intersection of Plane Boundaries of a Polytope with Acute Angles—E. M. Andreev	761	521
Partially Rational Trigonometric Sums—B. G. Kotsarev	765	529

VOLUME 8, NUMBER 5, NOVEMBER, 1970

On the Fiftieth Birthday of S. B. Stechkin	775	544
Almost Convex and Chebyshev Sets—L. P. Vlasov	776	545
Best Approximations of Functionals on Certain Sets—V. N. Gabushin	780	551
The Possibility of Periodic Spline Interpolation—P. V. Galkin	786	563
The Order of Approximation by Partial Sums of Lacunary Series in Banach Spaces —V. F. Gaposhkin	792	575
The Existence of a Best Approximating Element in (F)-Space with Integral Metric —A. L. Garkavi	797	583
Conditions for the Localization of Partial Sums of S. M. Nikol'skii's Class of Multiple Trigonometric Fourier Series—V. A. Il'in	803	595
Convergence of Riemann Sums for Functions which Can Be Represented by Trigonometric Series with Coefficients Forming a Monotonic Sequence—B. V. Pannikov	810	607
Quasiconvex Uniform-Convergence Factors for Fourier Series of Functions with a Given Modulus of Continuity—S. A. Telyakovskii	817	619
Some Estimates of Solutions of Degenerate (k, 0)-Elliptic Equations—L. P. Kuptsov	820	625
Newton's Method for the Solution of Systems of Equalities and Inequalities —B. N. Pshenichnyi	827	635

	Engl.	Russ.
Trigonometric Sums with Exponential Functions and the Distribution of Signs in Repeating Decimals—N. M. Korobov	831	641
Characteristic Properties of Strong Integral and Strong B-Integral Self-Adjoint Operators—V. B. Korotkov	838	653
Some Properties of Shannon Functions—N. A. Karpova	843	663
Solid Angles Subtended by Multidimensional Ellipsoids—E. G. Nikolaev	850	675

VOLUME 8, NUMBER 6, DECEMBER, 1970

	Engl.	Russ.
Ideally $\mathcal{H}$-Decomposable Semigroups—L. M. Martynov	857	681
The Construction, In Explicit Form, of an Analog of Cauchy's Kernel on Riemann Surfaces of Certain Algebraic Functions—É. I. Zverovich	863	693
Decomposition of Highest-Weight Representations of a Semisimple Lie Algebra into Representations of Regular Subalgebras—A. U. Klimyk	868	703
The Homotopic Type of Certain Compact Semigroups—A. M. Skryago	872	711
The Number of Strongly Connected Directed Graphs—V. A. Liskovets	877	721
A Complete Description of Convex Bodies Possessing the Markov Property—A. A. Nudel'man	883	733
Conditions for the Self-Adjointness of the Schrodinger Operator—F. S. Rofe-Beketov	888	741
Stability of a Linear Difference System with Random Parameters—V. M. Konstantinov and M. B. Nevel'son	895	753
A Condition for the Asymptotic Stability of a Linear Homogeneous System Whose Principal Part is a Jordan Matrix—V. A. Voblyi	900	761
A Criterion for the Oscillation of Solutions of Second-Order Ordinary Differential Equations—I. V. Kamenev	907	773
Fundamental Systems for Differential Equations with Operator Coefficients—A. P. Matkovskii and V. A. Mukhachev	910	777
A Method of Constructing Integrable Linear Equations and Its Application to Hill's Equation—G. E. Popov	914	783
Lattice Points in a Circle Whose Distances from the Center Are in an Arithmetic Progression—P. D. Varbanets	917	787
Fuchsian Modules—E. V. Pankrat'ev	924	799
Boundedness of Trigonometric Integrals and Polynomials in the L metric—Ya. S. Bugrov	931	811
Letter to the Editor Concerning the Communication "A Property of Fourier Series" by A. M. Rubinov—N. I. Chernykh	938	823
